No. M66343

Minute Order re: Seaside Groundwater Basin Watermaster 2007 Annual Report

The Court has received and read the 2007 Watermaster Report for the Seaside Groundwater Basin. It notes that Attachment 9, Page 10 of the report summarizes: "Existing provisions in the court-approved Seaside Basin Monitoring and Management Program (SBMMP) require certain groundwater-level and groundwater-quality data collection and reporting from Watermaster member production wells for incorporation into the Watermaster's consolidated groundwater-resources database. It appears that at least some of the required data collections have not been conducted by Watermaster members as prescribed in the SBMMP. If these required data had been available they would have significantly benefited the groundwater-level quality analyses recently undertaken as part of the Phase I implementation of the SBMMP."

The Annual Report references the Joe Oliver report (Attachment 9) at page 6, and states: "The Watermaster Board approved Fiscal Year 2008 Budgets that will fund implementation of all these recommendations, so that enhanced monitoring well network will be put into place during Water Year 2008."

To ensure full implementation of the judgment, the Court now orders that Watermaster provide supplemental information regarding the deficiencies noted above, and present a specific plan of action to cure those deficiencies, no later than February 28, 2008.
