Total Production by Alternative Producers =						289.8		
Total Production by Standard Producers =						1,246.0		

*Referred to as "M.E. Calabrese 1987 Trust" in Decision

Notes:

1. The Water Year (WY) begins October 1 and ends September 30 of the following calendar year. For example, WY 2010 began on October 1, 2009, and ends on September 30, 2010.
2. "Type" refers to water right as described in Seaside Basin Adjudication decision as amended, signed February 9, 2007 (Monterey County Superior Court Case No. M66343).
3. Values shown in the table are based on reports to the Watermaster as received by MPWMD by **July 15, 2010**.
4. All values are rounded to the nearest tenth of an acre-foot. Where required, reported data were converted to acre-feet utilizing the relationships: 325,851 gallons = 43,560 cubic feet = 1 acre-foot.
5. "Base Operating Yield Allocation" values are based on Seaside Basin Adjudication decision. These values are consistent with the Watermaster Producer Allocations Water Year 2010 (see Attachment 2 of Item VIII.B. in 11/4/2009 Board packet).
6. Any minor discrepancies in totals are attributable to rounding. CAW = California American Water.
7. Graniterock Company, DBO Development No. 27, and Cypress Pacific Investors wells have been determined by the Watermaster to be inactive production wells and are thus not required to report production figures.
8. As of July 15, 2010, Watermaster now tracks the net of the ASR injections and extractions.
