SCOPE OF WORK

The scope consists of providing professional consulting services to WATERMASTER for preparation of the 2013 Seawater Intrusion Analysis Report (SIAR).

• To promote efficiency, much of the text and graphics from the 2012 SIAR will be incorporated directly into the 2013 SIAR.

Preparing the 2013 SIAR will involve analyzing all water quality data at the end of Water Year 2013 (October 1, 2012 to September 30, 2013) and producing semi-annual (2nd and 4th quarters 2012) chloride concentration maps for each aquifer in the Basin. Time series graphs, trilinear graphs, and stiff diagram comparisons will be updated with new data. Second and fourth quarter groundwater elevation maps will also be produced. The annual EM logs will be analyzed to identify changes in seawater wedge locations. A determination of whether there is any evidence of seawater intrusion will be made, and recommendations will be included as warranted.

A Draft 2013 SIAR will be provided to WATERMASTER in electronic (not printed) form for review. WATERMASTER will provide its review comments and those of its TAC members through direct discussions with PROFESSIONAL at a TAC meeting. In addition to these oral comments, some TAC members may also provide recommended editorial changes electronically directly to PROFESSIONAL. These comments will be addressed in a Final 2013 SIAR. A CD containing an electronic version of the entire Final 2013 SIAR in MS Word and up to 15 printed and bound copies of the Final 2013 SIAR (quantity to be determined by WATERMASTER) will be provided to WATERMASTER.
